Transforming Technologies to Manage Our Information: The Future of Personal Information Management, Part 2 (Synthesis Lectures on Information Concepts, Retrieval, and S) William Jones

With its theme, "Our Information, Always and Forever," Part I of this book covers the basics of personal information management (PIM) including six essential activities of PIM and six (different) ways in which information can be personal to us. Part I then goes on to explore key issues that arise in the "great migration" of our information onto the Web and into a myriad of mobile devices.

Part 2 provides a more focused look at technologies for managing information that promise to profoundly alter our practices of PIM and, through these practices, the way we lead our lives.

Part 2 is in five chapters:

- Chapter 5. Technologies of Input and Output. Technologies in support of gesture, touch, voice, and even eye movements combine to support a more natural user interface (NUI). Technologies of output include glasses and "watch" watches. Output will also increasingly be animated with options to "zoom".

- Chapter 6. Technologies to Save Our Information. We can opt for "life logs" to record our experiences with increasing fidelity. What will we use these logs for? And what isn't recorded that should be?

- Chapter 7. Technologies to Search Our Information. The potential for personalized search is enormous and mostly yet to be realized. Persistent searches, situated in our information landscape, will allow us to maintain a diversity of projects and areas of interest without a need to continually switch from one to another to handle incoming information.

- Chapter 8. Technologies to Structure Our Information. Structure is key if we are to keep, find, and make effective use of our information. But how best to structure? And how best to share structured information between the applications we use, with other people, and also with ourselves over time? What lessons can we draw from the failures and successes in web-based efforts to share structure?

- Chapter 9. PIM Transformed and Transforming: Stories from the Past, Present and Future. Part 2 concludes with a comparison between Licklider's world of information in 1957 and our own world of information today. And then we consider what the world of information is likely to look like in 2057. Licklider estimated that he spent 85% of his "thinking time" in activities that were clerical and mechanical and might (someday) be delegated to the computer. What percentage of our own time is spent with the clerical and mechanical? What about in 2057?

From reader reviews:

Anne Bonk:

What do you about book? It is not important along? Or just adding material when you need something to explain what you problem? How about your extra time? Or are you busy person? If you don't have spare time to complete others business, it is gives you the sense of being bored faster. And you have time? What did you do? Every individual has many questions above. They must answer that question due to the fact just their can do in which. It said that about publication. Book is familiar in each person. Yes, it is proper. Because start from on pre-school until university need that Transforming Technologies to Manage Our Information: The Future of Personal Information Management, Part 2 (Synthesis Lectures on Information Concepts, Retrieval, and S) to read.

Jacqueline Lewis:

Playing with family in the park, coming to see the marine world or hanging out with close friends is thing that usually you may have done when you have spare time, and then why you don't try issue that really opposite from that. One particular activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of knowledge. Even you love Transforming Technologies to Manage Our Information: The Future of Personal Information Management, Part 2 (Synthesis Lectures on Information Concepts, Retrieval, and S), you are able to enjoy both. It is excellent combination right, you still desire to miss it? What kind of hang-out type is it? Oh can happen its mind hangout fellas. What? Still don't have it, oh come on its referred to as reading friends.

Eddie Grabowski:

Transforming Technologies to Manage Our Information: The Future of Personal Information Management, Part 2 (Synthesis Lectures on Information Concepts, Retrieval, and S) can be one of your beginning books that are good idea. Most of us recommend that straight away because this guide has good vocabulary that could increase your knowledge in terminology, easy to understand, bit entertaining but nevertheless delivering the information. The article writer giving his/her effort to put every word into joy arrangement in writing Transforming Technologies to Manage Our Information: The Future of Personal Information Management, Part 2 (Synthesis Lectures on Information Concepts, Retrieval, and S) but doesn't forget the main position, giving the reader the hottest and based confirm resource details that maybe you can be one of it. This great information may drawn you into brand new stage of crucial contemplating.

David Myers:

Are you kind of busy person, only have 10 or perhaps 15 minute in your day time to upgrading your mind proficiency or thinking skill actually analytical thinking? Then you are receiving problem with the book than can satisfy your short space of time to read it because this all time you only find publication that need more

time to be learn. Transforming Technologies to Manage Our Information: The Future of Personal Information Management, Part 2 (Synthesis Lectures on Information Concepts, Retrieval, and S) can be your answer as it can be read by anyone who have those short extra time problems.
