Cellular Aspects of Wood Formation: 20 (Plant Cell Monographs)

Cellular Aspects of Wood Formation: 20 (Plant Cell Monographs)

With today's ever growing economic and ecological problems, wood as a raw material takes on increasing significance as the most important renewable source of energy and as industrial feedstock for numerous products. Its chemical and anatomical structure and the excellent properties that result allow wood to be processed into the most diverse products; from logs to furniture and veneers, and from wood chippings to wooden composites and paper. The aim of this book is to review advances in research on the cellular aspects of cambial growth and wood formation in trees over recent decades. The book is divided into two major parts. The first part covers the basic process of wood biosynthesis, focusing on five major steps that are involved in this process: cell division, cell expansion, secondary cell wall formation, programmed cell death and heartwood formation. The second part of the book deals with the regulation of wood formation by endogenous and exogenous factors. On the endogenous level the emphasis is placed on two aspects: control of wood formation by phytohormones and by molecular mechanisms. Apart from endogenous factors, various exogenous effects (such as climate factors) are involved in wood formation. Due to modern microscopic as well as molecular techniques, the understanding of wood formation has progressed significantly over the last decade. Emphasizing the cellular aspects, this book first gives an overview of the basic process of wood formation, before it focuses on factors involved in the regulation of this process.

From reader reviews:

Scott Roche:

Now a day people who Living in the era everywhere everything reachable by talk with the internet and the resources within it can be true or not require people to be aware of each info they get. How people have to be smart in acquiring any information nowadays? Of course the reply is reading a book. Looking at a book can help persons out of this uncertainty Information specifically this Cellular Aspects of Wood Formation: 20 (Plant Cell Monographs) book because book offers you rich details and knowledge. Of course the data in this book hundred per cent guarantees there is no doubt in it you may already know.

Richard Riggins:

This book untitled Cellular Aspects of Wood Formation: 20 (Plant Cell Monographs) to be one of several books that will best seller in this year, that is because when you read this book you can get a lot of benefit into it. You will easily to buy this book in the book retail store or you can order it via online. The publisher in this book sells the e-book too. It makes you easier to read this book, because you can read this book in your Cell phone. So there is no reason to you to past this e-book from your list.

Luz Cox:

A lot of people always spent their particular free time to vacation or even go to the outside with them family or their friend. Were you aware? Many a lot of people spent many people free time just watching TV, as well as playing video games all day long. In order to try to find a new activity that's look different you can read the book. It is really fun for yourself. If you enjoy the book you read you can spent the entire day to reading a e-book. The book Cellular Aspects of Wood Formation: 20 (Plant Cell Monographs) it is rather good to read. There are a lot of individuals who recommended this book. These were enjoying reading this book. In case you did not have enough space to bring this book you can buy often the e-book. You can m0ore simply to read this book through your smart phone. The price is not to fund but this book provides high quality.

Jose Hackler:

What is your hobby? Have you heard that will question when you got learners? We believe that that question was given by teacher for their students. Many kinds of hobby, Every person has different hobby. And you also know that little person such as reading or as reading through become their hobby. You must know that reading is very important as well as book as to be the factor. Book is important thing to add you knowledge, except your own personal teacher or lecturer. You see good news or update regarding something by book. Different categories of books that can you take to be your object. One of them is actually Cellular Aspects of Wood Formation: 20 (Plant Cell Monographs).
