The behavior and sensory biology of elasmobranch fishes: an anthology in memory of Donald Richard Nelson (Developments in Environmental Biology of Fishes)

The elasmobranch fishes include the living sharks, skates and rays that are important members of nearly all marine ecosystems. Their large size, secretive behavior, and wide-ranging habits make them difficult to observe in the field or to maintain in captivity. Consequently, little is known about their natural behavior and how it is mediated by their sensory systems. This volume is dedicated to the scientific contributions and memory of Donald Nelson, a pioneer in the study of shark behavior, sensory biology, and remote instrumentation. The two opening papers review Don Nelson's unique scientific accomplishments and provide insight into his strong bias towards study of animals in the field. These are followed by 14 scientific papers on elasmobranch behavior, sensory biology, and current monitoring technologies. The papers on elasmobranch sensory biology and behavior address questions on hearing, the lateral line, electroreception, the brain, orientation behavior, chemical irritants, feeding, and reproduction. The latter section of the volume presents papers on conventional tagging techniques, ultrasonic telemetry, physiological telemetry, remote monitoring techniques, archival tagging and satellite tagging. The intent of this volume is to familiarize both new and established scientists with the sensory biology and behavior of sharks and rays, and to encourage further behavioral research on these animals in their natural environment.

From reader reviews:

Jesse Reid:

Now a day people that Living in the era wherever everything reachable by match the internet and the resources inside can be true or not need people to be aware of each details they get. How people have to be smart in receiving any information nowadays? Of course the answer is reading a book. Examining a book can help folks out of this uncertainty Information especially this The behavior and sensory biology of elasmobranch fishes: an anthology in memory of Donald Richard Nelson (Developments in Environmental Biology of Fishes) book since this book offers you rich facts and knowledge. Of course the data in this book hundred pct guarantees there is no doubt in it you know.

Rita Lattimore:

This The behavior and sensory biology of elasmobranch fishes: an anthology in memory of Donald Richard Nelson (Developments in Environmental Biology of Fishes) are usually reliable for you who want to become a successful person, why. The reason of this The behavior and sensory biology of elasmobranch fishes: an anthology in memory of Donald Richard Nelson (Developments in Environmental Biology of Fishes) can be on the list of great books you must have is usually giving you more than just simple studying food but feed you actually with information that possibly will shock your before knowledge. This book will be handy, you can bring it all over the place and whenever your conditions throughout the e-book and printed versions. Beside that this The behavior and sensory biology of elasmobranch fishes: an anthology in memory of Donald Richard Nelson (Developments in Environmental Biology of Fishes) forcing you to have an enormous of experience like rich vocabulary, giving you demo of critical thinking that we know it useful in your day pastime. So , let's have it and luxuriate in reading.

Jonathan Bean:

Your reading 6th sense will not betray you, why because this The behavior and sensory biology of elasmobranch fishes: an anthology in memory of Donald Richard Nelson (Developments in Environmental Biology of Fishes) book written by well-known writer whose to say well how to make book which can be understand by anyone who all read the book. Written with good manner for you, still dripping wet every ideas and writing skill only for eliminate your hunger then you still hesitation The behavior and sensory biology of elasmobranch fishes: an anthology in memory of Donald Richard Nelson (Developments in Environmental Biology of Fishes) as good book not simply by the cover but also with the content. This is one guide that can break don't ascertain book by its protect, so do you still needing a different sixth sense to pick this specific!/? Oh come on your looking at sixth sense already said so why you have to listening to another sixth sense.

Preston Garza:

What is your hobby? Have you heard that will question when you got college students? We believe that that

question was given by teacher on their students. Many kinds of hobby, Everybody has different hobby. And you also know that little person just like reading or as reading become their hobby. You need to know that reading is very important in addition to book as to be the issue. Book is important thing to increase you knowledge, except your current teacher or lecturer. You see good news or update concerning something by book. A substantial number of sorts of books that can you choose to use be your object. One of them is this The behavior and sensory biology of elasmobranch fishes: an anthology in memory of Donald Richard Nelson (Developments in Environmental Biology of Fishes).
