Study specifically of riparian zones is relatively new in hydrology, and while the oldest of the 36 benchmark papers selected for this volume dates to 1936, several of the others were published in the 1970s and 1980s. They are grouped under the topics: Landscape ecology, Hydrology of the riparian zone, Linking riparian zone hydrology to solute transport, Biogeochemical processes and methods, Riparian buffering of surface and subsurface flows, and In-stream processes. Together, the reprinted papers and the editors commentaries map the breakthroughs in the development of this important subdiscipline.
