Side Effects of Drugs Annual: A worldwide yearly survey of new data and trends in adverse drug reactions

Volume 28 in the series of Side Effects of Drugs Annuals (<http://www.elsevier.com/locate/series/seda>) continues to serve its primary goal: to provide clinicians and medical investigators with a reliable and critical yearly survey of new data and trends in the area of Adverse Drug Reactions and Interactions. An international team of specialists has reviewed new data and trends by selecting from the year's writing all that is truly new and informative, by critically interpreting it, and by pointing to whatever is unproven or misleading. The use of the book is enhanced by separate indexes, allowing the reader to access the text via drug name, adverse effect, or drug interaction.

The current annual includes an essay by the editor, Dr Jeffrey Aronson, entitled 'Classifying Drug Adverse Reactions in the 21st Century.' In it he describes how the modern approach to classifying adverse drug reactions takes into account the dose that causes the reaction, the time-course of the reaction, and the susceptibility factors that increase the individual patient's risk, and shows how this analysis can facilitate regulatory decision making.

- *Provides a critical yearly survey of new data and trends
- *Includes an essay that describes the modern approach to classifying adverse drug reactions
- *Special reviews in this Annual include, among other topics: Antipsychotic drugs and new-onset diabetes mellitus, Treating asthma during pregnancy, and MMR vaccine and autism
