Complex Analysis and Differential Equations (Springer Undergraduate Mathematics Series) Luis Barreira, Claudia Valls

This text provides an accessible, self-contained and rigorous introduction to complex analysis and differential equations. Topics covered include holomorphic functions, Fourier series, ordinary and partial differential equations.

The text is divided into two parts: part one focuses on complex analysis and part two on differential equations. Each part can be read independently, so in essence this text offers two books in one. In the second part of the book, some emphasis is given to the application of complex analysis to differential equations. Half of the book consists of approximately 200 worked out problems, carefully prepared for each part of theory, plus 200 exercises of variable levels of difficulty.

Tailored to any course giving the first introduction to complex analysis or differential equations, this text assumes only a basic knowledge of linear algebra and differential and integral calculus. Moreover, the large number of examples, worked out problems and exercises makes this the ideal book for independent study.

From reader reviews:

Nancy Farley:

The book Complex Analysis and Differential Equations (Springer Undergraduate Mathematics Series) can give more knowledge and also the precise product information about everything you want. Exactly why must we leave the great thing like a book Complex Analysis and Differential Equations (Springer Undergraduate Mathematics Series)? Some of you have a different opinion about e-book. But one aim which book can give many info for us. It is absolutely suitable. Right now, try to closer with your book. Knowledge or details that you take for that, you could give for each other; you could share all of these. Book Complex Analysis and Differential Equations (Springer Undergraduate Mathematics Series) has simple shape but the truth is know: it has great and big function for you. You can seem the enormous world by wide open and read a book. So it is very wonderful.

Kenneth Kelly:

Reading a guide can be one of a lot of exercise that everyone in the world loves. Do you like reading book consequently. There are a lot of reasons why people love it. First reading a book will give you a lot of new facts. When you read a publication you will get new information simply because book is one of a number of ways to share the information as well as their idea. Second, reading a book will make an individual more imaginative. When you looking at a book especially tale fantasy book the author will bring someone to imagine the story how the people do it anything. Third, it is possible to share your knowledge to other folks. When you read this Complex Analysis and Differential Equations (Springer Undergraduate Mathematics Series), you may tells your family, friends as well as soon about yours e-book. Your knowledge can inspire the mediocre, make them reading a e-book.

Katie Johnson:

You can spend your free time to study this book this book. This Complex Analysis and Differential Equations (Springer Undergraduate Mathematics Series) is simple bringing you can read it in the park, in the beach, train in addition to soon. If you did not possess much space to bring typically the printed book, you can buy the particular e-book. It is make you better to read it. You can save the actual book in your smart phone. Consequently there are a lot of benefits that you will get when one buys this book.

Gloria White:

Many people spending their time by playing outside with friends, fun activity having family or just watching TV all day every day. You can have new activity to invest your whole day by examining a book. Ugh, think reading a book can actually hard because you have to accept the book everywhere? It all right you can have the e-book, taking everywhere you want in your Smart phone. Like Complex Analysis and Differential Equations (Springer Undergraduate Mathematics Series) which is getting the e-book version. So , why not try out this book? Let's notice.
