Swarm Planning: The Development of a Planning Methodology to Deal with Climate Adaptation (Springer Theses) Rob Roggema

This book shows that the problem of climate adaptation, which is described in social planning terms as ‘wicked,’ is at odds with the contemporary practice of spatial planning. The author proposes a new adjusted framework which is more adaptable to unpredictable, wicked, dynamic and non-linear processes. The inspiration for this new method is the behaviour of swarms: bees, ants, birds and fish are capable of self-organization, which enables the system to become less vulnerable to sudden environmental changes. The framework proposed in Swarm Planning consists of these four elements: Two levels of complexity, the first being the whole system and the second its individual components. Each of these has different attributes for adapting to change. Five layers, consisting of networks, focal points, unplanned space, natural resources and emerging occupation patterns. Each layer has its own spatial dynamic, and each is connected to a spatial scale. Non-linear processes, which emerge in different parts of the framework and include emerging patterns, connectedness and tipping points among others. Two planning processes; the first, ‘from small to large’ works upward from the slowest changing elements to more rapidly-changing ones. The second, ‘on the list of partners’ addresses each layer from networks through emerging occupation patterns. Swarm Planning applies this framework to a series of pilot studies, and appraises its performance using criteria for an adaptive landscape. The results show that the use of the Swarm Planning Framework reduces the vulnerability of landscapes as well as the impact of climate hazards and disasters, improves response to unexpected hazards and contains adaptation strategies.

“This book is a must for planners in government and the private sector as it outlines the concept, strategies and techniques for swarm planning. It is also an important guide for policymakers looking to engage communities in a dialogue about the adaptation planning process.”

Professor John Martin, La Trobe University

“The ultimate value of the book lies in encouraging the planning community to consider options that go far beyond those offered by business-as-usual planning methodologies developed for a set of operating conditions that are fast becoming obsolete. As such it makes an important and much needed contribution to the field.”

Assistant Professor Dr. Chrisna du Plessis, University of Pretoria

From reader reviews:

Patricia Henderson:

As people who live in the particular modest era should be change about what going on or data even knowledge to make these people keep up with the era and that is always change and move forward. Some of you maybe can update themselves by reading books. It is a good choice for you personally but the problems coming to a person is you don't know what kind you should start with. This Swarm Planning: The Development of a Planning Methodology to Deal with Climate Adaptation (Springer Theses) is our recommendation to cause you to keep up with the world. Why, as this book serves what you want and need in this era.

Jane Moore:

Your reading 6th sense will not betray a person, why because this Swarm Planning: The Development of a Planning Methodology to Deal with Climate Adaptation (Springer Theses) reserve written by well-known writer we are excited for well how to make book which might be understand by anyone who all read the book. Written within good manner for you, still dripping wet every ideas and composing skill only for eliminate your own hunger then you still question Swarm Planning: The Development of a Planning Methodology to Deal with Climate Adaptation (Springer Theses) as good book but not only by the cover but also from the content. This is one guide that can break don't ascertain book by its protect, so do you still needing another sixth sense to pick that!? Oh come on your reading sixth sense already said so why you have to listening to yet another sixth sense.

Michael Hansen:

Are you kind of active person, only have 10 or even 15 minute in your morning to upgrading your mind skill or thinking skill even analytical thinking? Then you are receiving problem with the book when compared with can satisfy your short time to read it because all of this time you only find reserve that need more time to be read. Swarm Planning: The Development of a Planning Methodology to Deal with Climate Adaptation (Springer Theses) can be your answer because it can be read by a person who have those short free time problems.

Ernestine Pagan:

Reserve is one of source of information. We can add our know-how from it. Not only for students but also native or citizen have to have book to know the revise information of year to help year. As we know those publications have many advantages. Beside all of us add our knowledge, can bring us to around the world. With the book Swarm Planning: The Development of a Planning Methodology to Deal with Climate Adaptation (Springer Theses) we can consider more advantage. Don't that you be creative people? To get creative person must like to read a book. Just simply choose the best book that suitable with your aim. Don't end up being doubt to change your life with that book Swarm Planning: The Development of a Planning

Methodology to Deal with Climate Adaptation (Springer Theses). You can more inviting than now.
