**Responsible Mining: Case Studies in Managing Social & Environmental Risks in the Developed World**

## **Mining Can Be Environmentally and Socially Responsible?and Still Profitable**

Even in this regulated, environmentally aware world, running a mine can be done safely, with combined goals of maximizing both the return on investment from extraction and the positive environmental and social impact that a well-run, responsible mine can offer.

*Responsible Mining* is your comprehensive guide to addressing social and environmental risks at mines in the developed world.

This book gathers case studies of best practices across the full range of issues. With examples from four continents, you can learn from both your home territory and around the world. Seventy-two leading mine engineers, forestry scientists, conservationists, environmental consultants, sustainability professionals, and geologists from prominent universities, extraction businesses, nongovernmental organizations, and governments have come together within these pages to lead you safely and profitably toward socially, environmentally, and economically beneficial mining practices.

Organized around ten sustainability principles required of International Council on Mining and Metals members (including some of the largest extraction businesses in the world), the book addresses nearly every environmental and social consequence of mining in developed countries, including:

- Protecting biodiversity
- Minimizing negative impacts on climate change
- Interacting appropriately with indigenous peoples
- Enhancing the local community and reducing poverty
- Reusing and recycling materials
- Recovering energy
- Recapturing and reusing water
- Managing proper storage, reclamation, and disposal of tailings
- Restoring the land after ceasing mining operations

You will want to make this book required reading for all members of your team who are responsible for environmental compliance, resource recovery, sustainability, energy management, and marketing/public relations to facilitate cross-departmental discussions about how to incorporate best practices into your business plans.

#### **Billie Gallagher:**

As a college student exactly feel bored to reading. If their teacher questioned them to go to the library or make summary for some book, they are complained. Just little students that has reading's heart and soul or real their leisure activity. They just do what the instructor want, like asked to go to the library. They go to generally there but nothing reading significantly. Any students feel that reading through is not important, boring in addition to can't see colorful photos on there. Yeah, it is to become complicated. Book is very

important to suit your needs. As we know that on this age, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore this Responsible Mining: Case Studies in Managing Social & Environmental Risks in the Developed World can make you sense more interested to read.
