**Noncommutative Differential Geometry and Its Applications to Physics: Proceedings of the Workshop at Shonan, Japan, June 1999 (Mathematical Physics Studies)**

Noncommutative differential geometry is a new approach to classical geometry. It was originally used by Fields Medalist A. Connes in the theory of foliations, where it led to striking extensions of Atiyah-Singer index theory. It also may be applicable to hitherto unsolved geometric phenomena and physical experiments. However, noncommutative differential geometry was not well understood even among mathematicians. Therefore, an international symposium on commutative differential geometry and its applications to physics was held in Japan, in July 1999. Topics covered included: deformation problems, Poisson groupoids, operad theory, quantization problems, and D-branes. The meeting was attended by both mathematicians and physicists, which resulted in interesting discussions. This volume contains the refereed proceedings of this symposium.

Providing a state of the art overview of research in these topics, this book is suitable as a source book for a seminar in noncommutative geometry and physics.

**From reader reviews:**

**Carrie Rivas:**

Reading a publication can be one of a lot of activity that everyone in the world likes. Do you like reading book consequently. There are a lot of reasons why people enjoyed. First reading a guide will give you a lot of new facts. When you read a book you will get new information simply because book is one of various ways to share the information or maybe their idea. Second, studying a book will make a person more imaginative. When you reading a book especially fictional works book the author will bring someone to imagine the story how the people do it anything. Third, you could share your knowledge to others. When you read this Noncommutative Differential Geometry and Its Applications to Physics: Proceedings of the Workshop at Shonan, Japan, June 1999 (Mathematical Physics Studies), you may tells your family, friends as well as soon about yours guide. Your knowledge can inspire the mediocre, make them reading a e-book.

**Lillian Carlucci:**

In this time globalization it is important to someone to obtain information. The information will make someone to understand the condition of the world. The fitness of the world makes the information better to share. You can find a lot of sources to get information example: internet, paper, book, and soon. You can see that now, a lot of publisher in which print many kinds of book. The actual book that recommended to you personally is Noncommutative Differential Geometry and Its Applications to Physics: Proceedings of the Workshop at Shonan, Japan, June 1999 (Mathematical Physics Studies) this reserve consist a lot of the information in the condition of this world now. This book was represented how can the world has grown up. The language styles that writer use for explain it is easy to understand. Often the writer made some exploration when he makes this book. That's why this book ideal all of you.

**Michael Banks:**

This Noncommutative Differential Geometry and Its Applications to Physics: Proceedings of the Workshop at Shonan, Japan, June 1999 (Mathematical Physics Studies) is brand-new way for you who has intense curiosity to look for some information given it relief your hunger details. Getting deeper you into it getting knowledge more you know or you who still having tiny amount of digest in reading this Noncommutative Differential Geometry and Its Applications to Physics: Proceedings of the Workshop at Shonan, Japan, June 1999 (Mathematical Physics Studies) can be the light food in your case because the information inside this particular book is easy to get by simply anyone. These books develop itself in the form that is reachable by anyone, yep I mean in the e-book application form. People who think that in publication form make them feel tired even dizzy this publication is the answer. So there isn't any in reading a publication especially this one. You can find actually looking for. It should be here for an individual. So , don't miss that! Just read this e-book kind for your better life in addition to knowledge.

**Pedro Gonzales:**

Reading a publication make you to get more knowledge from this. You can take knowledge and information from a book. Book is written or printed or outlined from each source which filled update of news. In this modern era like at this point, many ways to get information are available for anyone. From media social just like newspaper, magazines, science publication, encyclopedia, reference book, book and comic. You can add your understanding by that book. Do you want to spend your spare time to spread out your book? Or just trying to find the Noncommutative Differential Geometry and Its Applications to Physics: Proceedings of the Workshop at Shonan, Japan, June 1999 (Mathematical Physics Studies) when you essential it?
