Getting Started with the Parallax Propeller Jessica Uelmen

This is the definitive starting point for people who want to get up and running with Parallax's Propeller platform. The Propeller is a unique architecture among microcontrollers and will be interesting to folks who have mastered Arduino and need a bit more power and flexibility. The Propeller has the ability to do things in software for which an Arduino-based solution would need additional hardware.

Parallax released the Propeller microcontroller in 2006 as a follow-up to their BASIC Stamp module. It has become the chip maker's flagship product and a favorite of embedded hobbyists. Propeller Quickstart development boards are available in every Radio Shack.

The Propeller (also known as the P8X32) is unusual in the field in that it has eight "cores" (called "cogs") that can be programmed to run in parallel. The platform's speed, power and price make it attractive for makers and artists, especially those interested in generating video and sound. People who got started using microcontrollers with the Arduino may find the Propeller to be the next step for more challenging applications.

From reader reviews:

Richard Tipton:

What do you consider book? It is just for students as they are still students or the idea for all people in the world, the particular best subject for that? Only you can be answered for that problem above. Every person has different personality and hobby per other. Don't to be pushed someone or something that they don't desire do that. You must know how great and important the book Getting Started with the Parallax Propeller. All type of book are you able to see on many methods. You can look for the internet sources or other social media.

Adeline Bonds:

A lot of people always spent their very own free time to vacation as well as go to the outside with them loved ones or their friend. Do you realize? Many a lot of people spent many people free time just watching TV, or even playing video games all day long. If you need to try to find a new activity here is look different you can read any book. It is really fun for yourself. If you enjoy the book that you read you can spent the whole day to reading a reserve. The book Getting Started with the Parallax Propeller it doesn't matter what good to read. There are a lot of individuals who recommended this book. These were enjoying reading this book. When you did not have enough space to deliver this book you can buy often the e-book. You can m0ore quickly to read this book from a smart phone. The price is not to cover but this book offers high quality.

Dorothea Profitt:

Many people spending their period by playing outside along with friends, fun activity using family or just watching TV the whole day. You can have new activity to spend your whole day by reading a book. Ugh, do you consider reading a book really can hard because you have to accept the book everywhere? It alright you can have the e-book, bringing everywhere you want in your Smart phone. Like Getting Started with the Parallax Propeller which is getting the e-book version. So , try out this book? Let's notice.

Robert Quinonez:

As a university student exactly feel bored to reading. If their teacher requested them to go to the library or to make summary for some guide, they are complained. Just tiny students that has reading's internal or real their hobby. They just do what the instructor want, like asked to go to the library. They go to generally there but nothing reading seriously. Any students feel that looking at is not important, boring as well as can't see colorful photographs on there. Yeah, it is to get complicated. Book is very important in your case. As we know that on this era, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. So , this Getting Started with the Parallax Propeller can make you truly feel more interested to read.
