Water Engineering with a Spreadsheet Ashok Pandit

Water Engineering with the Spreadsheet: A Workbook for Water Resources Calculations Using Excel presents more than 90 problems, from easy to difficult, in the areas of fluid mechanics, hydraulics, hydrology, and stormwater management. The accompanying unlocked spreadsheets are used to solve the problems and provide hands-on experience with Excel.

Ashok Pandit, Ph.D., P.E., has been employing spreadsheets in the classroom and in practice for more than 20 years. Used as a supplement to undergraduate and graduate texts and lectures, Pandit's book will help students gain a solid foundation in using spreadsheets for applications in water engineering. Topics include: force calculations under static and dynamic conditions, pipe design, and pipe network analysis; open channel flow; normal and critical depth calculations; channel designs and transitions; lake evaporation; unit hydrographs and S-hydrographs; convolution and deconvolution; reservoir and channel routing; and analysis and design of stormwater management systems for land development, including retention/detention basins and storm sewers.

Pandit provides background information, helpful hints, assumptions, equations to be used, solutions, and a what-if analysis to provide an in-depth examination of the problem. Advanced features of Excel spreadsheets, such as Goal Seek, Circulation Cells, and Trendlines, are explored.

Students will find this book an excellent preparation for the fundamentals of engineering or professional engineering exams. Practitioners may also find this a convenient collection of ready-to-use spreadsheets for a professional practice.

From reader reviews:

Ryan Wysocki:

Nowadays reading books become more than want or need but also be a life style. This reading routine give you lot of advantages. The huge benefits you got of course the knowledge the rest of the information inside the book that improve your knowledge and information. The info you get based on what kind of reserve you read, if you want send more knowledge just go with schooling books but if you want really feel happy read one together with theme for entertaining such as comic or novel. Often the Water Engineering with a Spreadsheet is kind of publication which is giving the reader unforeseen experience.

Harold McDonough:

A lot of people always spent their very own free time to vacation or perhaps go to the outside with them family members or their friend. Do you know? Many a lot of people spent that they free time just watching TV, or maybe playing video games all day long. If you need to try to find a new activity that's look different you can read a book. It is really fun for yourself. If you enjoy the book that you just read you can spent all day every day to reading a guide. The book Water Engineering with a Spreadsheet it is extremely good to read. There are a lot of those who recommended this book. We were holding enjoying reading this book. If you did not have enough space to bring this book you can buy the particular e-book. You can m0ore easily to read this book out of your smart phone. The price is not to cover but this book possesses high quality.

Thelma Scott:

Beside this particular Water Engineering with a Spreadsheet in your phone, it may give you a way to get closer to the new knowledge or facts. The information and the knowledge you are going to got here is fresh from your oven so don't always be worry if you feel like an old people live in narrow town. It is good thing to have Water Engineering with a Spreadsheet because this book offers to you personally readable information. Do you often have book but you rarely get what it's exactly about. Oh come on, that will not end up to happen if you have this inside your hand. The Enjoyable option here cannot be questionable, like treasuring beautiful island. Use you still want to miss that? Find this book in addition to read it from right now!

Christopher Wilkerson:

This Water Engineering with a Spreadsheet is brand-new way for you who has fascination to look for some information given it relief your hunger of knowledge. Getting deeper you in it getting knowledge more you know or you who still having little bit of digest in reading this Water Engineering with a Spreadsheet can be the light food to suit your needs because the information inside this book is easy to get through anyone. These books produce itself in the form which can be reachable by anyone, that's why I mean in the e-book application form. People who think that in reserve form make them feel drowsy even dizzy this publication is the answer. So there is absolutely no in reading a guide especially this one. You can find what you are looking for. It should be here for an individual. So , don't miss the item! Just read this e-book type for your

better life and also knowledge.
