British Seashells: A Guide for Collectors and Beachcombers Paul Chambers

Using original Victorian prints, by collectable artist George Sowerby, marine biologist and author Paul Chambers has produced the first comprehensive guide to shells for over a century. The original prints are intricately detailed (much better than photographs which lack the exact detail of these drawings) and are a selling point in themselves but will be complemented by informative but accessible text, including families and to show what's edible, dangerous or belongs to mollusk families and in what part of the country they can be discovered. A delightful study by the leading expert and a must for anyone interested in learning more about shells – or who just enjoys beach combing with the family.
